

2026 Technology Masterclass Bundle

Five original, 7-module professional course manuals

These manuals are structured as original educational content. Before commercial publication, customize branding, examples, exercises, legal notices, instructor details, and any provider-specific claims.

1. AI Engineering & Generative AI — Professional Masterclass

- Module 1 — AI Engineering Foundations
- Module 2 — LLM Application Architecture
- Module 3 — Embeddings, RAG and Knowledge Systems
- Module 4 — Tool Calling, Agents and MCP
- Module 5 — Fine-Tuning, Multimodal AI and Advanced Models
- Module 6 — Evaluation, Safety, Security and Production Operations
- Module 7 — Capstone: Production AI SaaS

2. AI Agents & Automation — Professional Masterclass

- Module 1 — Automation Foundations
- Module 2 — Agent Architecture and Tool Use
- Module 3 — n8n-Style Workflow Automation and Integrations
- Module 4 — MCP, Tools and Connected AI Systems
- Module 5 — Business Process Agents
- Module 6 — Reliability, Security and Economics
- Module 7 — Capstone: AI Automation Agency / SaaS

3. Full-Stack Web Development — Professional Masterclass

- Module 1 — Web Foundations and Developer Workflow
- Module 2 — React, TypeScript and Frontend Architecture
- Module 3 — Backend APIs, Databases and Authentication
- Module 4 — Payments, Files, Search and Third-Party Services
- Module 5 — Testing, Security and Performance
- Module 6 — Docker, Cloud and Deployment
- Module 7 — Capstone: Production SaaS Application

4. Data Science & Machine Learning — Professional Masterclass

- Module 1 — Python, SQL and Data Foundations
- Module 2 — Statistics and Experimental Thinking
- Module 3 — Supervised Machine Learning
- Module 4 — Unsupervised Learning and Deep Learning
- Module 5 — ML Pipelines, Feature Stores and MLOps
- Module 6 — Applied AI, Generative Models and Responsible ML
- Module 7 — Capstone: End-to-End Data Product

5. Cloud, DevOps & Cybersecurity — Professional Masterclass

- Module 1 — Linux, Networking and Systems
- Module 2 — Cloud Architecture
- Module 3 — Docker, Kubernetes and CI/CD
- Module 4 — Application and Cloud Security
- Module 5 — Monitoring, SRE and Incident Response
- Module 6 — Advanced Infrastructure and Zero-Trust Thinking
- Module 7 — Capstone: Secure Production Platform
